EDUCATION

2023	**Ph.D.**, Ecology, **University of Bristol**, UK
2018	**MRes**, Ecology, **Nanjing University**, China
2015	**B.Sc**, Forestry, **Fujian A. & F. University**, China

APPOINTMENTS

2026 -	Postdoctoral Research Associate, **Royal Holloway,** UK
2026 -	Visiting Research Fellow, **University of Leeds**, UK
2022–2025	Postdoctoral Research Fellow, **University of Leeds**, UK
2022–2024	Honorary Research Associate, **University of Bristol**, UK

PUBLICATIONS

Published

1. Liu, T., Wang L., Chen, J., Fei, M., Harvey, J.A., Xu, C., Lewis, O.T., **Li, D.**, Xu, N., Xu, C., Sun S., Xi, X.. (2026) Seasonal temperature fluctuation promotes the persistence of a multi-trophic community. Ecology Letters, 29(10), e70461.
2. **Li, D.**, Clements, C. F., & Memmott, J. (2026) Linear features affect pollination success in experimental plant assemblages. Oecologia, 208(64)
3. **Li, D.**, Clements, C. F., & Memmott, J. (2024). Isolation limits spring pollination in a UK fragmented landscape. Plos one, 19(9), e0310679.
4. **Li, D.**, Brough, B., Rees, J. W., Coste, C. F., Yuan, C., Fowler, M. S., & Sait, S. M. (2024). Humidity modifies species-specific and age-dependent heat stress effects in an insect host-parasitoid interaction. Ecology and Evolution, 14(7), e70047.
5. **Li, D.**, Memmott, J., & Clements, C. F. (2023). Corridor quality buffers extinction under extreme droughts in experimental metapopulations. Ecology and Evolution, 13(6), e10166.
6. **Li, D.**, Clements, C. F., Shan, I. L., & Memmott, J. (2021). Corridor quality affects net movement, size of dispersers, and population growth in experimental microcosms. Oecologia, 195(2), 547-556.
7. Xi, X., **Li, D.**, Peng, Y., Eisenhauer, N., & Sun, S. (2016). Experimental warming and precipitation interactively modulate the mortality rate and timing of spring emergence of a gallmaking Tephritid fly. Scientific Reports, 6(1), 32284.

PUBLICATIONS

In submission and preprint

1. Coste, C.F.D, Petersen, B., **Li, D.**, Yuan, C., Sait, S.M., Fowler, M.S.,(2026) How does the rate of environmental change affect density-dependent populations? (EcoEvoRxirv)
2. **Li, D.**, Adeniji, LAJ, Meah, RJ, Clements, CF. (2026) Pollination responses to artificial light at night depend on lighting configuration. (BioRxiv)
3. Liu, T., **Li, D.**, Harvey, J.A., Xi, X.. (2026) Parasitoids saved hosts by interfering a more efficient competitor. (Ecology – under review)

In preparation (drafts upon request)

1. **Li, D.**, Coste, C. F., Newton, J., Yuan, C., Fowler, M. S., & Sait, S. M. Warming drives host–parasitoid collapse through disrupted synchrony and trait-mediated declines.
2. **Li, D.**, Coste, C. F., Mugabo, M., Yuan, C., Fowler, M. S., & Sait, S. M. Trophic interaction buffers the effect of environmental noise colour on host-parasitoid interaction.
3. **Li, D.**, Newton J., Rees, J.W. & Sait, S. M. Host thermal acclimation determines the stage-specific effect of heat stress on parasitoids.
4. **Li, D.**, Brown, H., Newton, J., Coste, C. F., Yuan, C., Fowler, M. S., & Sait, S. M. Warming reorganises the temporal resonance of delayed density-dependent regulation in host-parasitoid dynamics.

Thesis

PhD The effectiveness of wildlife corridors in theory and in practice, University of Bristol, 2023

MRes The impact of experimental warming on insect community dynamics. Nanjing University, 2018

RESEARCH GRANTS & AWARDS

Research Grants

2024 Deans Vocation Research Scholarship Leeds (**£3,250,** 3-months)

2022 Bristol Faculty of Life Sciences Extension grant (**£3,600,** 3-months)

Small Grants & Travel Awards

2022 BCRS Scholarship Fund (**£500**)

2021 Bristol Alumni Travel Grant (**£500**)

TALKS AND CONFERENCE PRESENTATIONS

Contributed Talks

2024 **BES Annual Meeting**, Liverpool, UK. The impact of environmental noise colour on the population dynamics of an insect host-parasitoid interaction.

2023 **BES Annual Meeting**, Belfast, UK. Humidity modifies heat wave effects on an insect host-parasitoid interaction.

2022 **BES Annual Meeting**, Edinburgh, UK. Isolation limits spring pollination in a UK fragmented landscape.

Posters

2025 **BES Annual Meeting**, Edinburgh, UK. Faster rate of warming disrupts trophic interactions in an experimental host-parasitoid system.

2021 **BES Annual Meeting**, Liverpool, UK. The impact of artificial hedgerows on the pollination of plant communities.

2020 **BES Annual Meeting**, Edinburgh (online), UK. Corridor quality affects net movement, size of dispersers, and population growth in experimental microcosms.

TEACHING

2023–2024 **Statistical Analysis and Applications of R, University of Leeds**

Provided group tutorials on statistical analysis to 1st and 2nd year undergraduates; reviewed student reports and provided feedback.

2024 **Lead supervision of DVRS research project, University of Leeds**

Provided supervision and laboratory training in experimental design, laboratory techniques and data analysis for undergraduate summer research.

2024–2025 **Lab demonstrator, University of Bristol**

Provide instruction on practical courses on plant biology; statistical analysis.

MENTORSHIP

2024–2025 **Postgraduate mentor, University of Leeds**

Organised regular meetings and discussions for a group of 5–10 postgraduates; provided guidance on academic progress, time management and research planning.

SERVICE

Society and Institution Service

2022 **Volunteer, BES Annual Meeting**, Edinburgh, UK

Assisted with on-site logistics for workshops and parallel sessions; supported delegates and collaborated with the organising team to maintain event operations.

Journal Reviews

Proceedings B, The American Naturalist, Frontiers in Physiology, Biology Letters

OUTREACH

2026 **Digital Research Infrastructure Retreat**, Manchester, UK

Served as an in-person panellist on the ethics of using AI in digital research; collaborated with UKRI and industry funders to develop guidance for digital research environments.

2019 **Pollinator Festival**, Bristol, UK

Engaged non-specialist audiences on pollinator conservation and pollination services as an academic exhibitor.

PROGRAMMING AND STATISTICAL SKILLS

Programming: R, Julia, Stan, QGIS

Expertise: Time-series modelling and forecasting

Statistical methods: Spectral and wavelet analysis; multivariate analysis; Bayesian ODE models; structural equation modelling; autoregressive models; spatial analysis; continuous-time simulation models

Languages: Chinese (native), English (fluent)

TRAINING COURSES

2026 **INLA and Beyond: Bayesian hierarchical modelling with inlabru**

In-person workshop on spatio-temporal modelling using the INLA methodology for fast and deterministic Bayesian inference.

2022 **Quantitative methods for population dynamics in R**, France

Online training in population projection models, estimation of demographic parameters, capture–recapture models and N-mixture models.
